1.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2.Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bright (4,761,232) in view of Coombes et al. (5,290,494) as set forth in the previous Office action.

3.Applicants' arguments filed April 27, 2007 have been fully considered but they are not persuasive. Applicants argue that there is no motivation to combine the cited references. In support of that position, applicants note that in Bright, it is clear that the formation of the microporous matrix is related to the extraction of the polymeric pore former while in Coombes, it is clear that the formation of the microporous material is related to the extraction of the solvent. Applicants' then conclude that there is actually a teaching away from the combination of these references. The examiner disagrees and views the references relied upon as presenting alternative methods for producing a porous material from a polymer. It is the examiner's position that the references relied upon teach or suggest to one of ordinary skill in the art that either method is suitable for preparing a porous material.

4.THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1732

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
